

## Input

Task Specification

## Planning

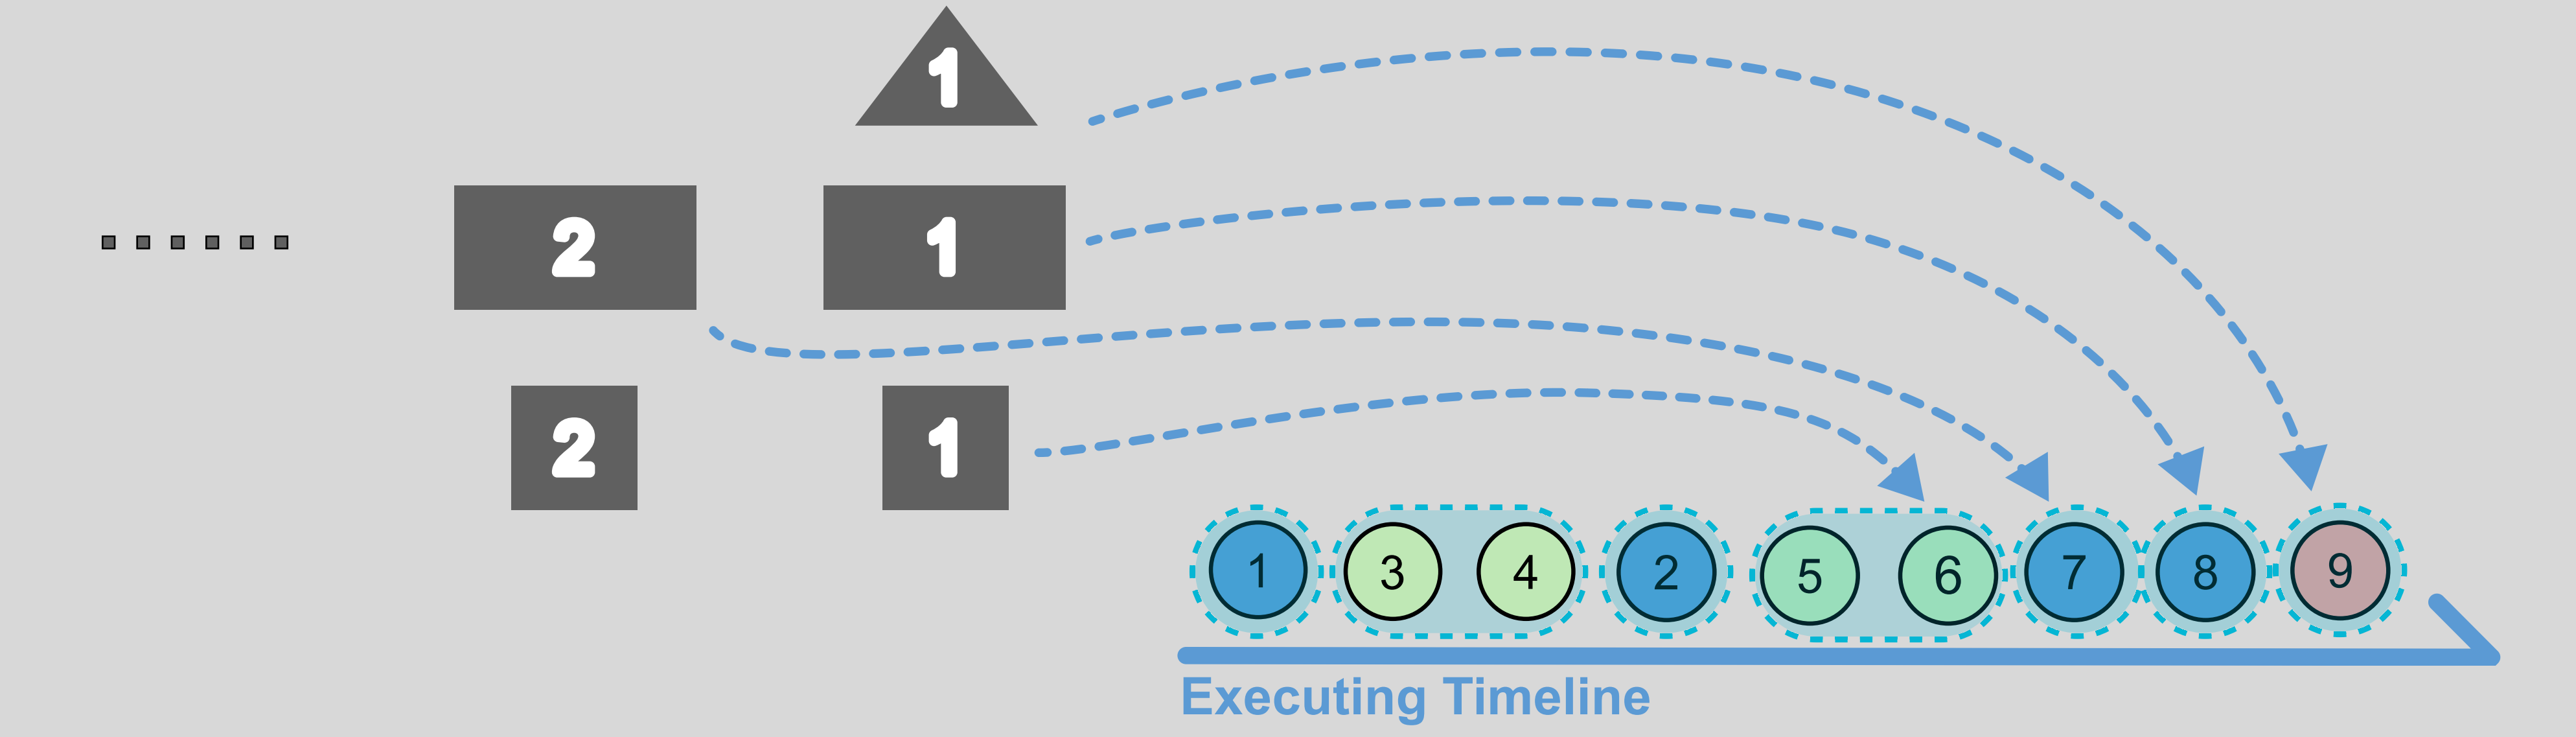

1. VLM Graph Generation

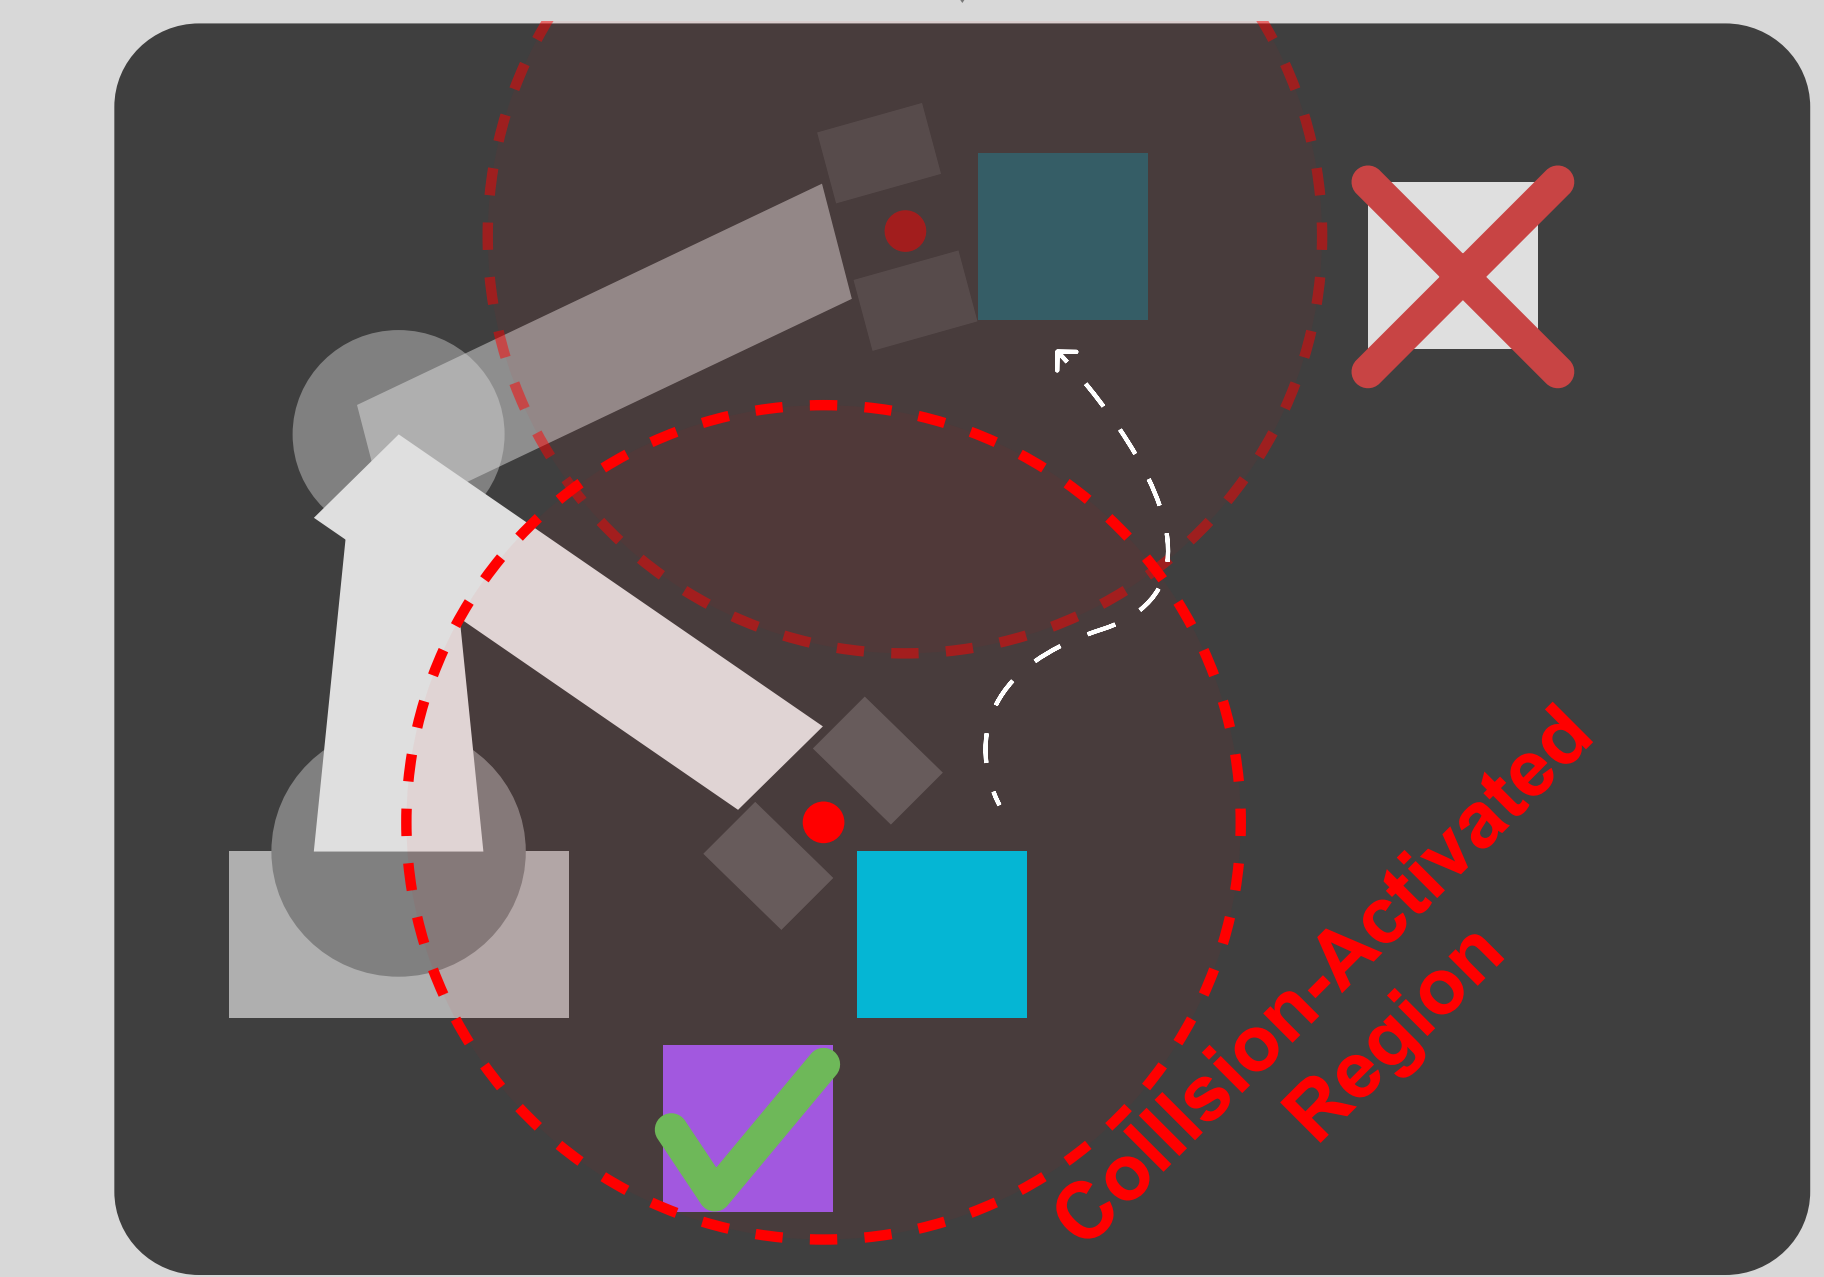

2. Two-Level Clustering

3. Global Execution Sequence

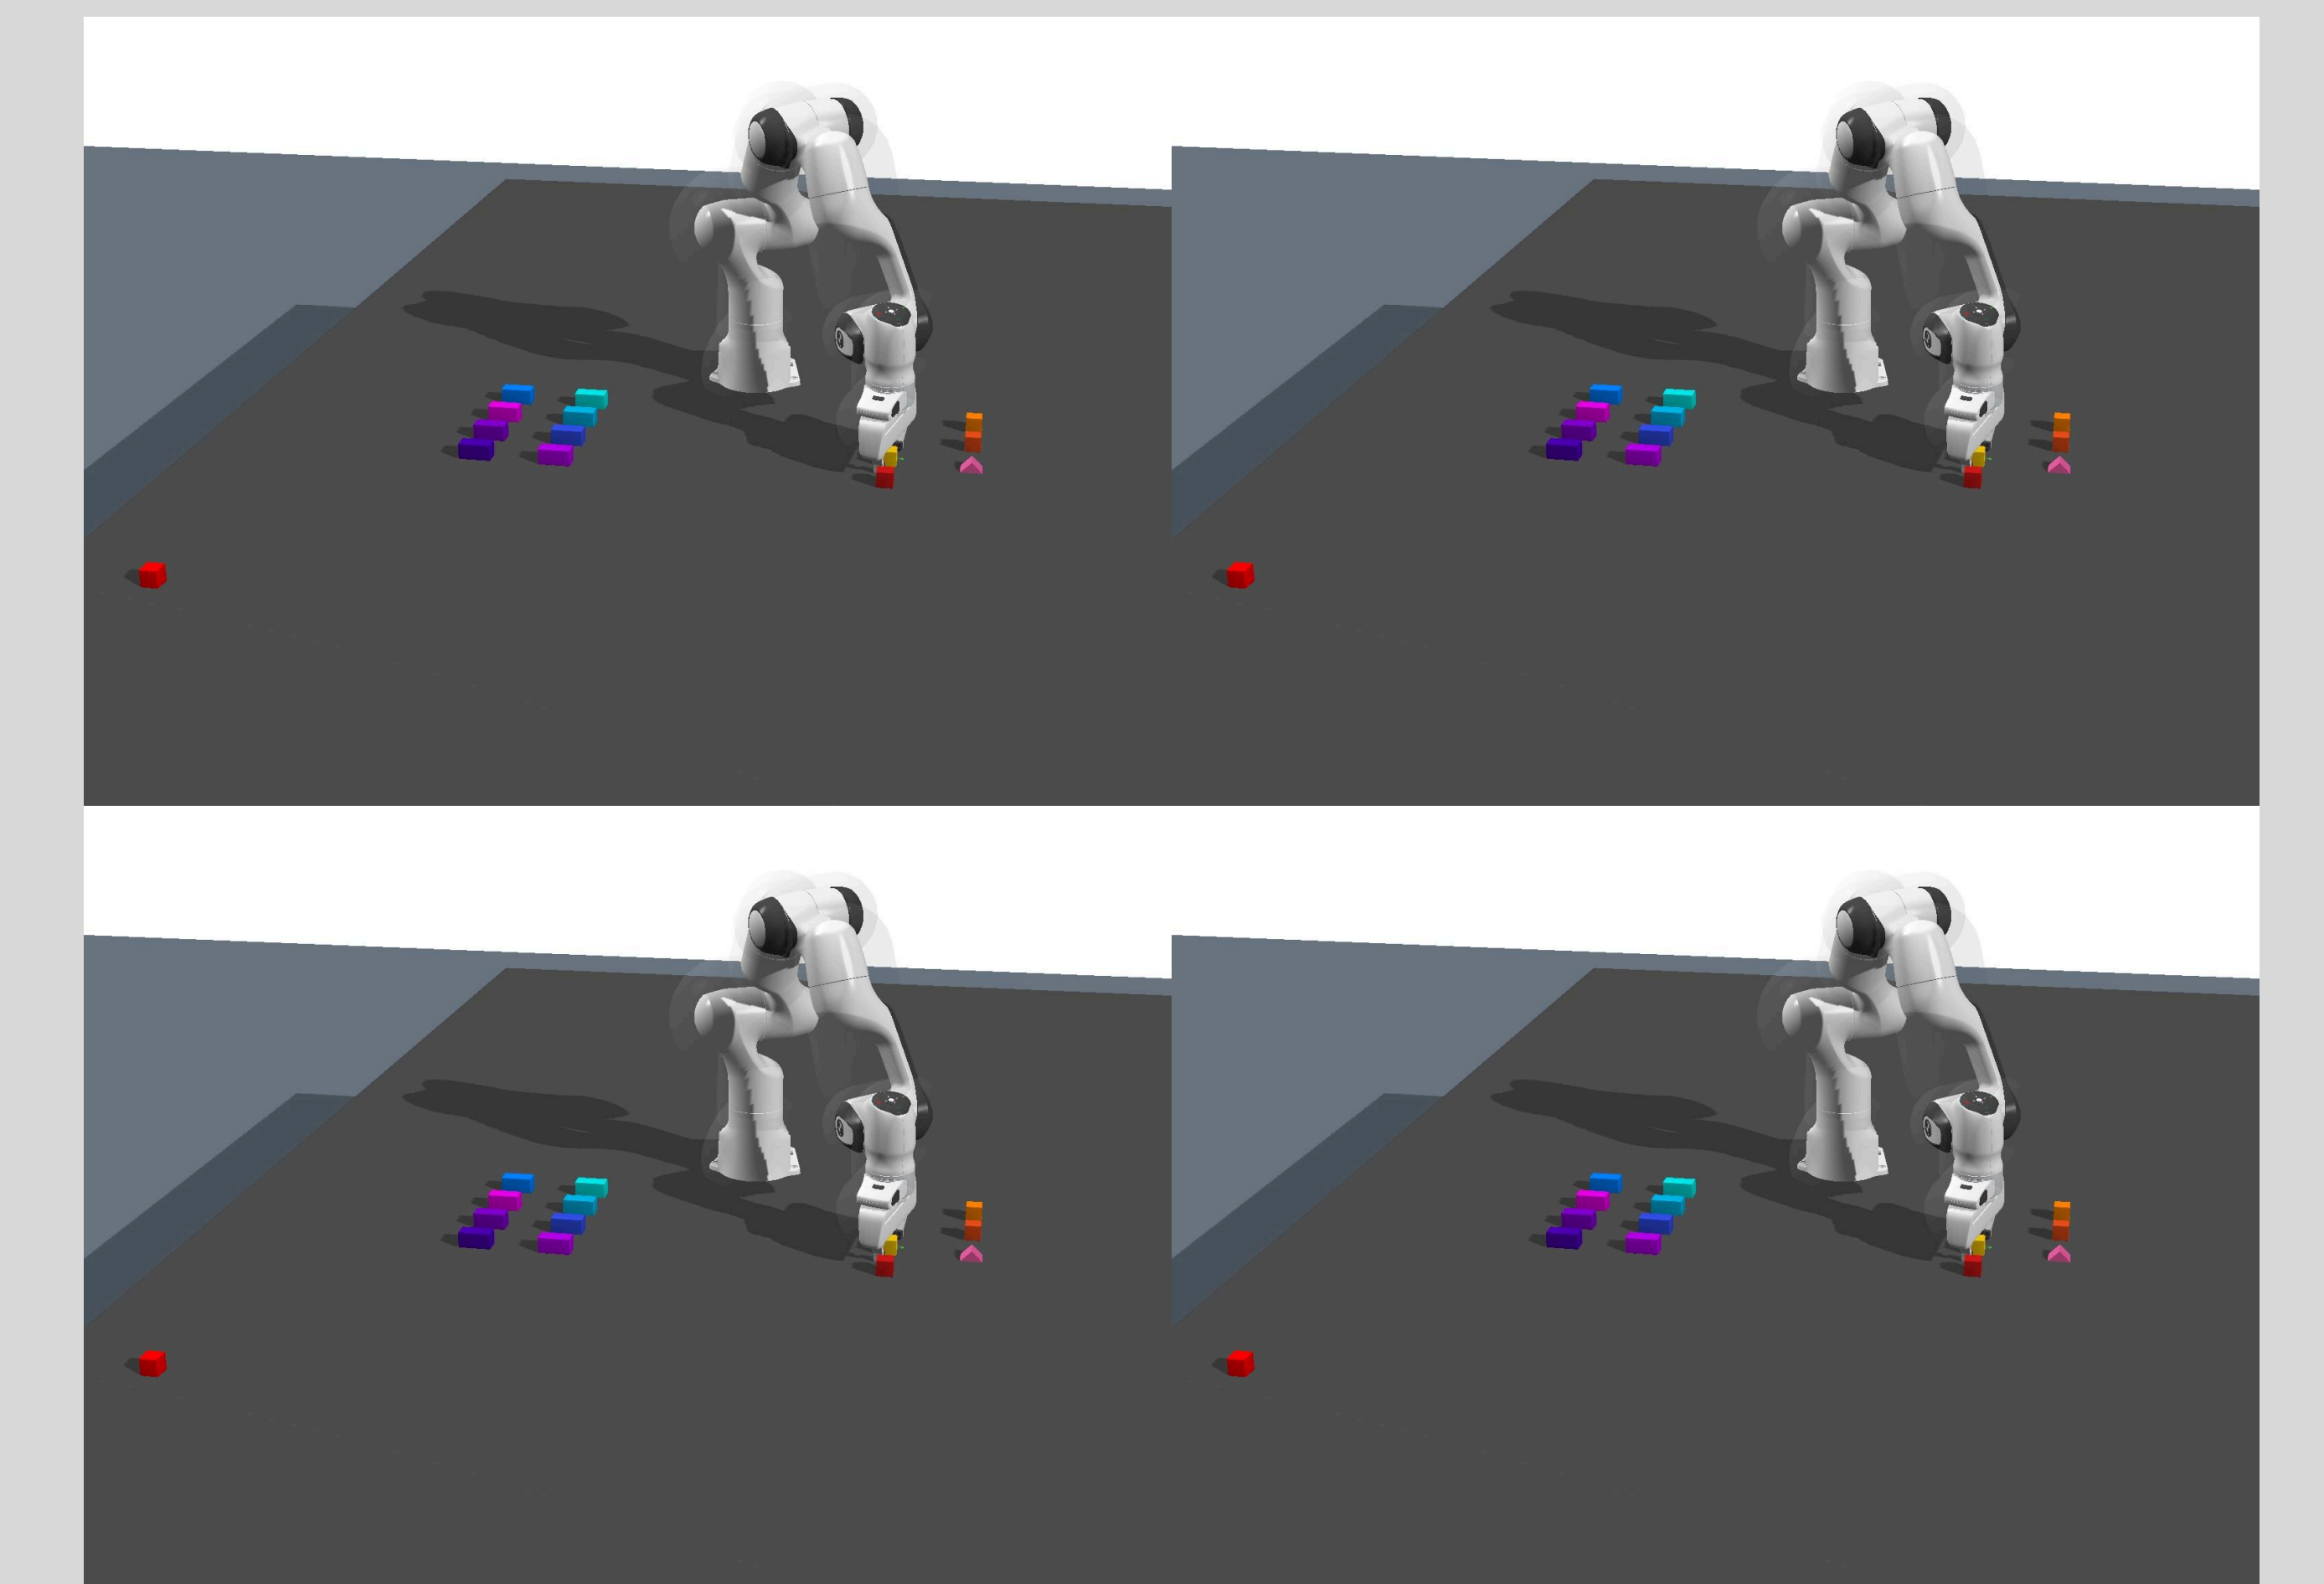

## Solving & Executing

Execution-Order Embedding

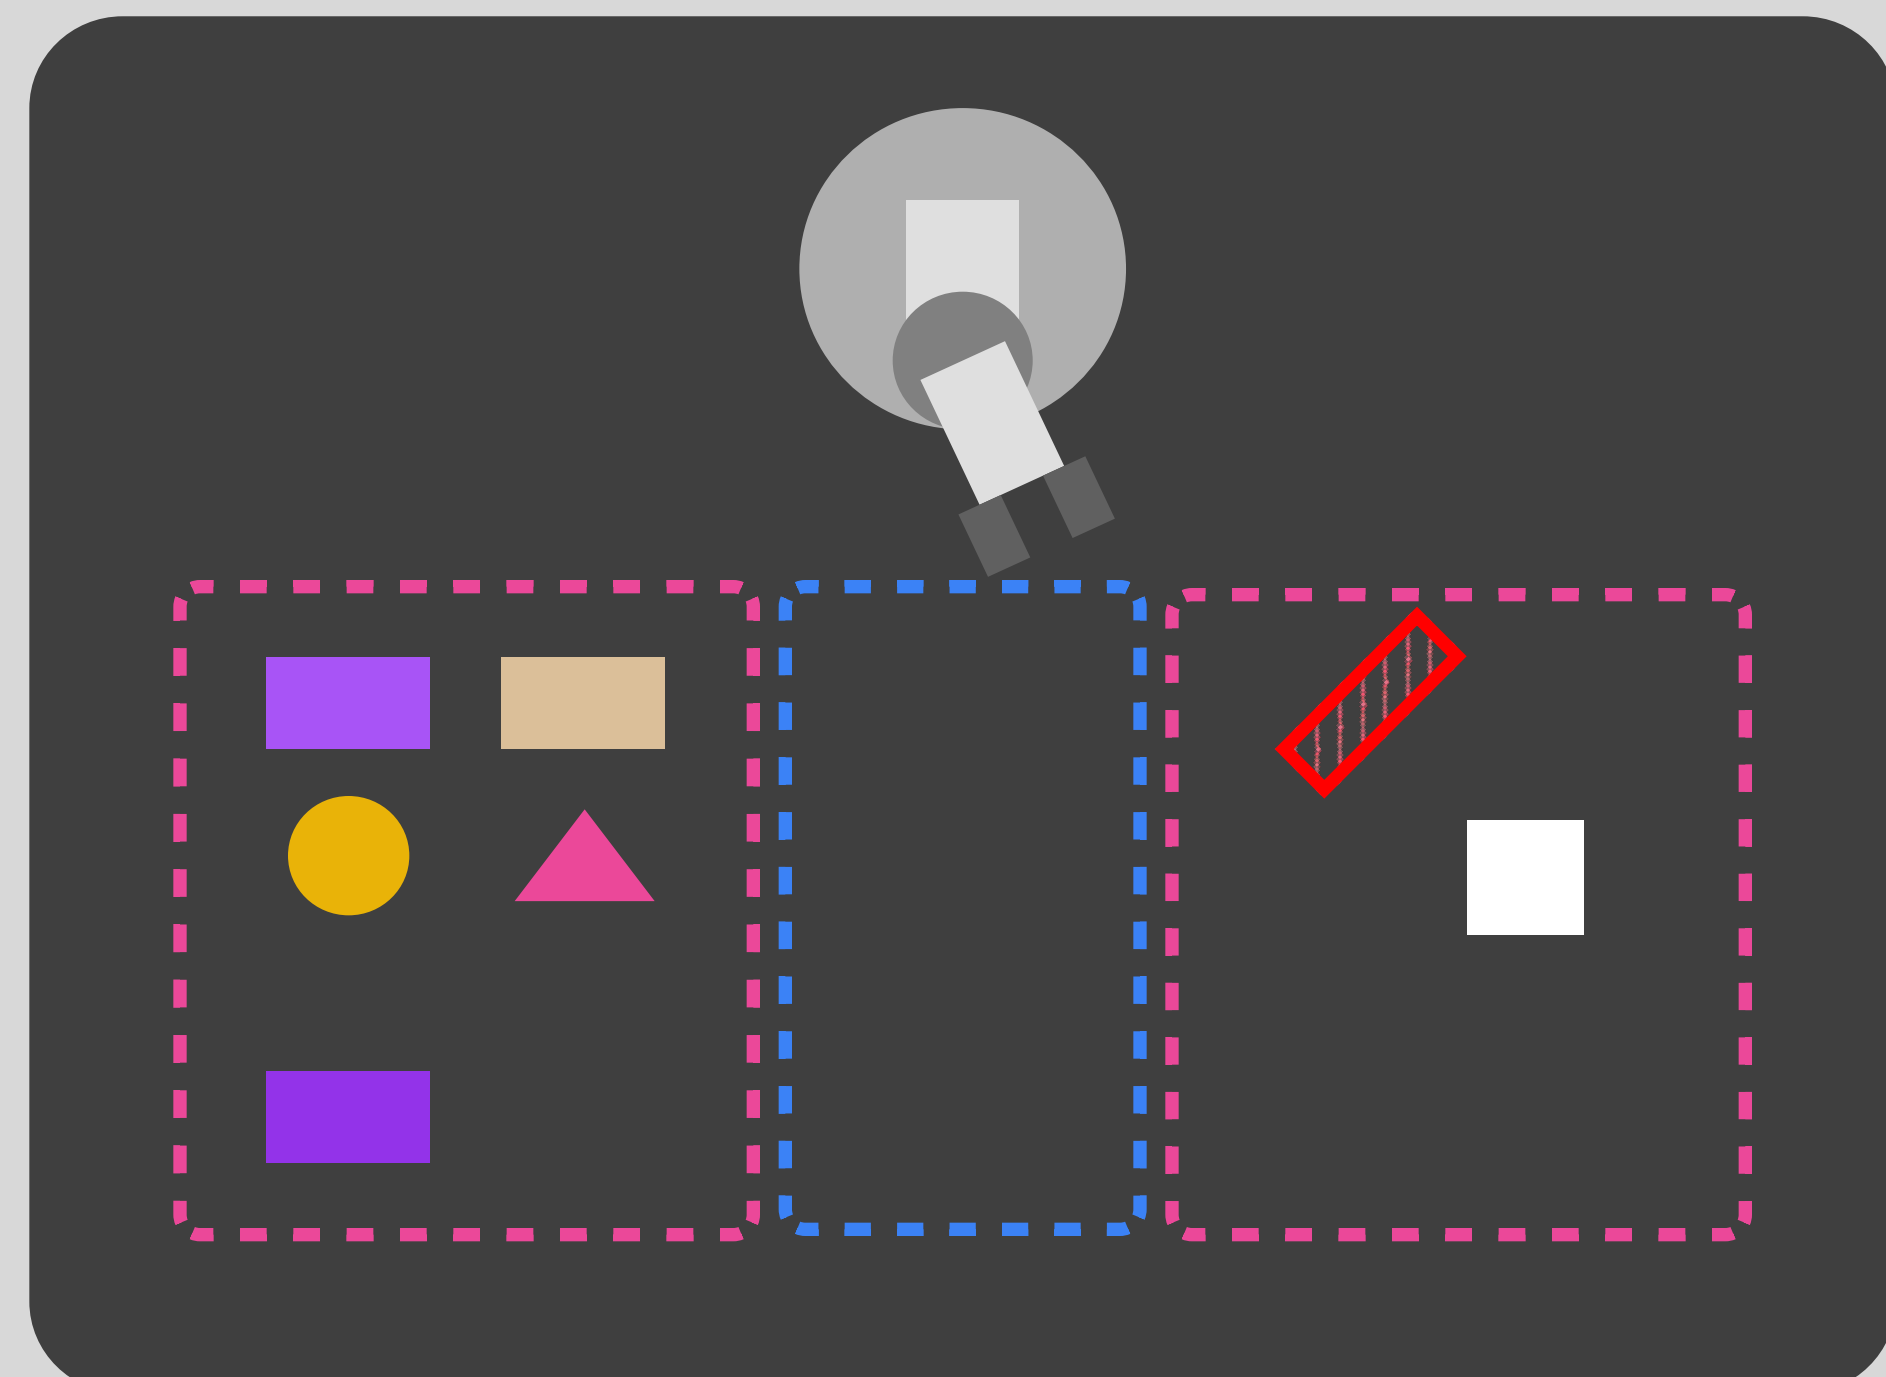

Selective LGP Solving with Active Constraints

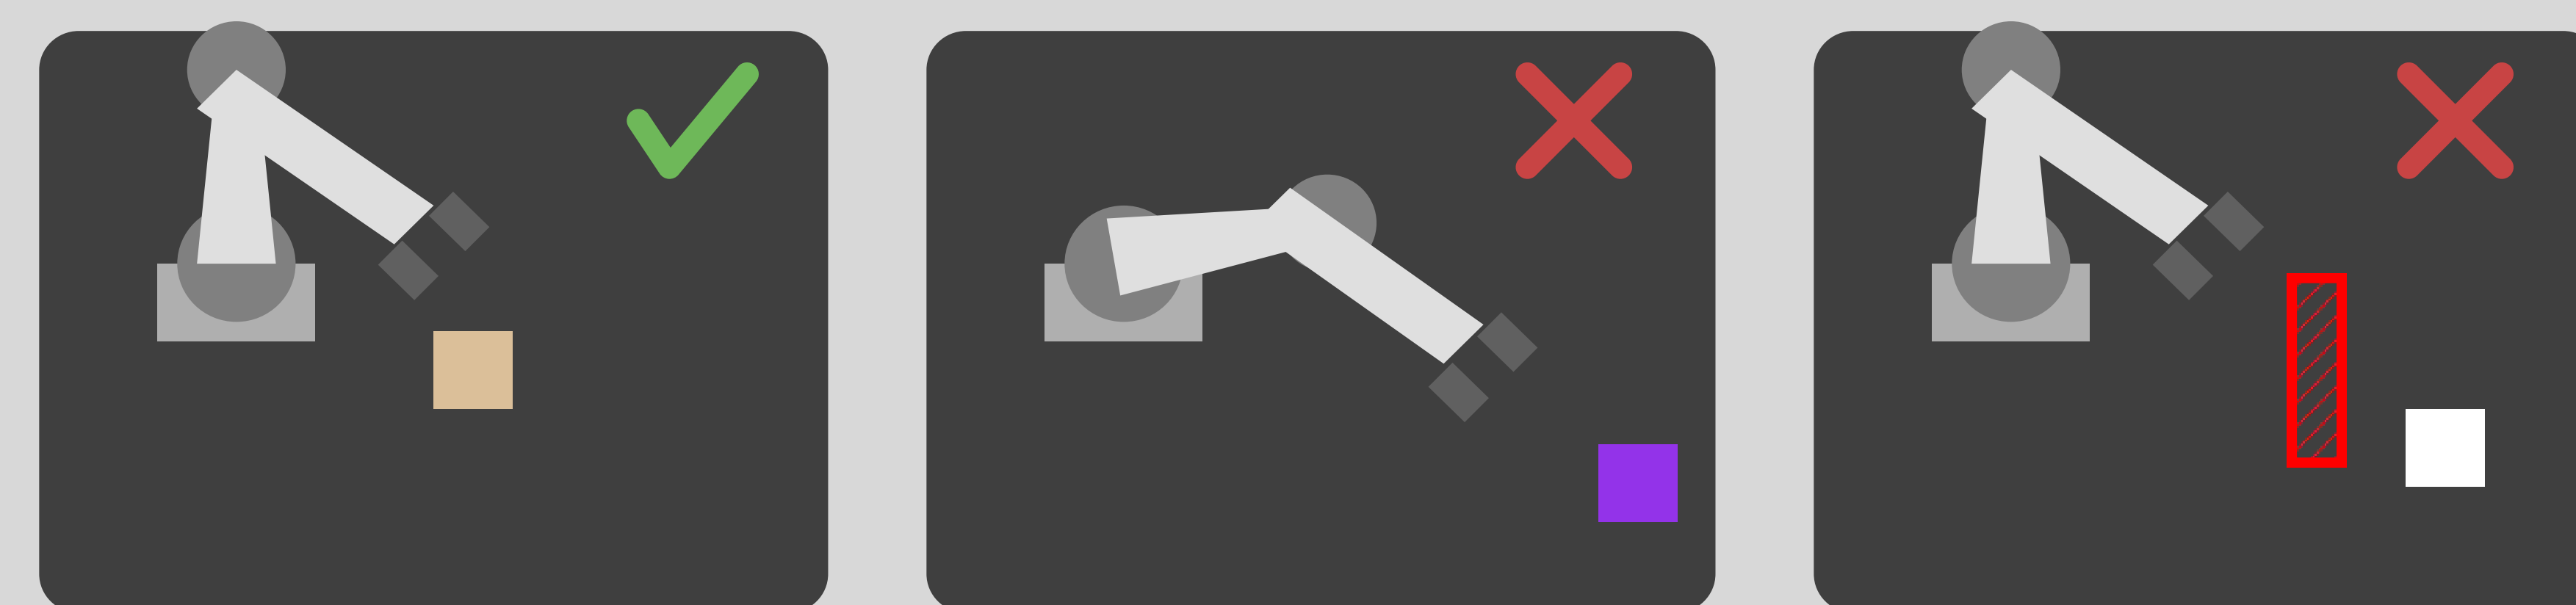

Real Robot Execution

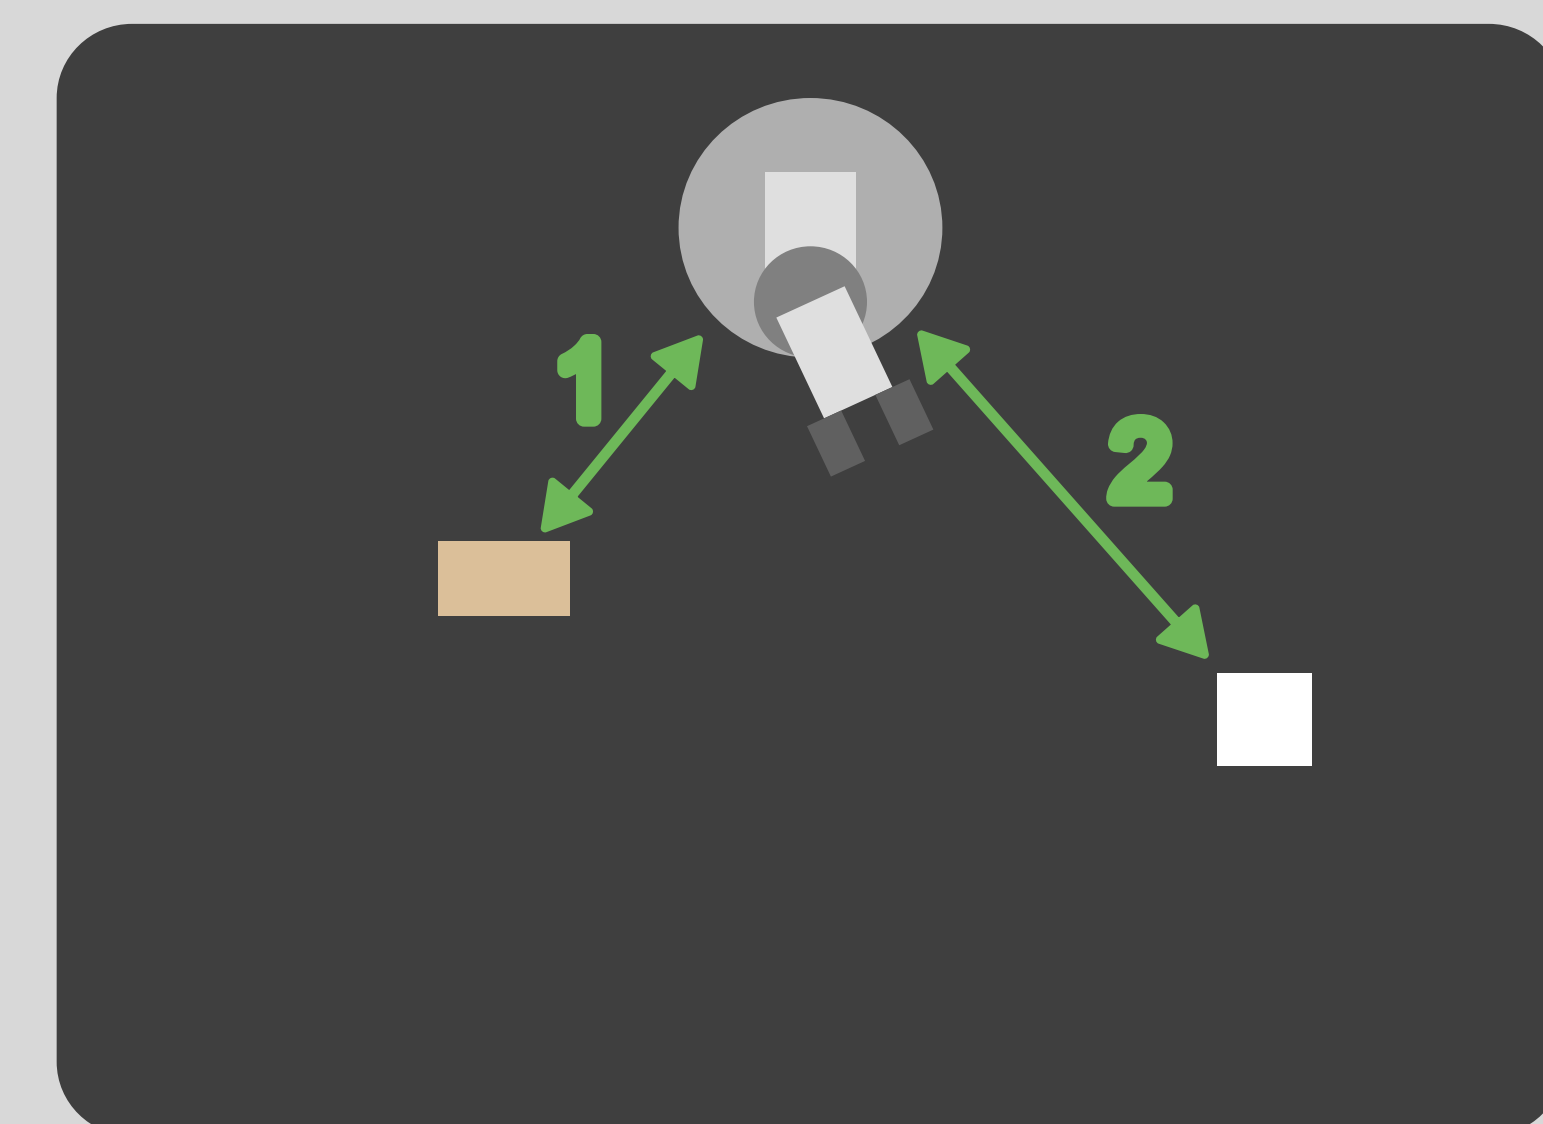

Pickup Area  
Assembly Area

Initial Scene

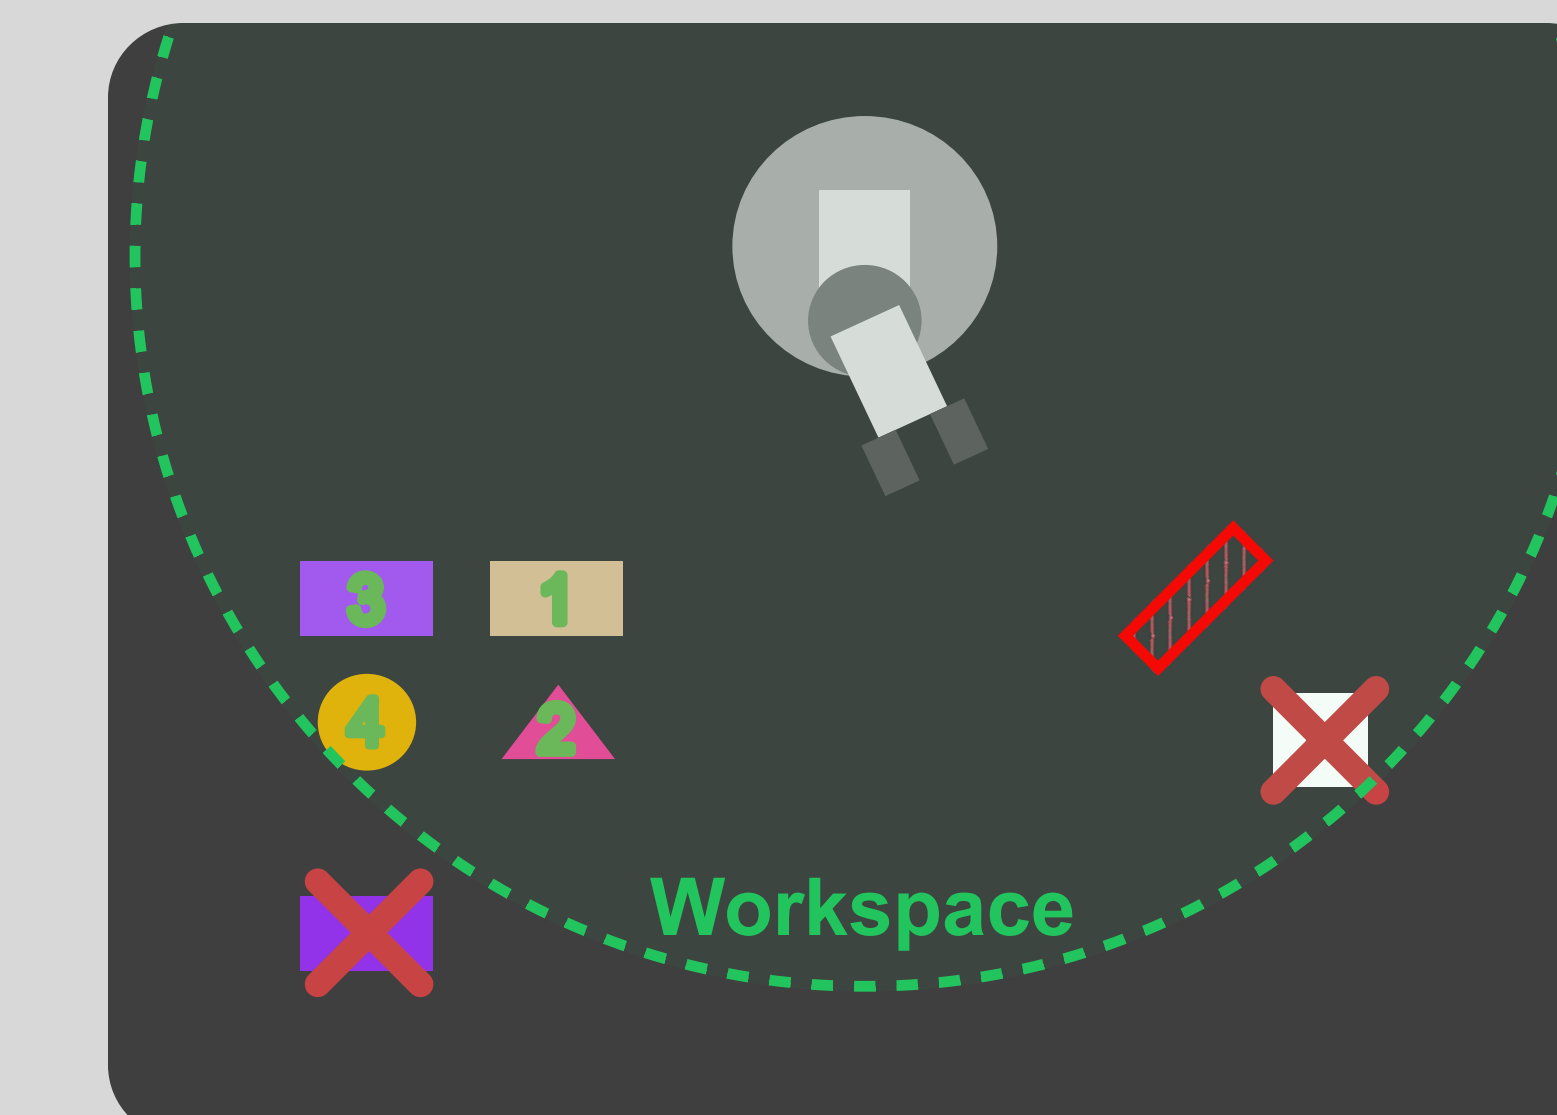

0.1.1 Reachability Detection

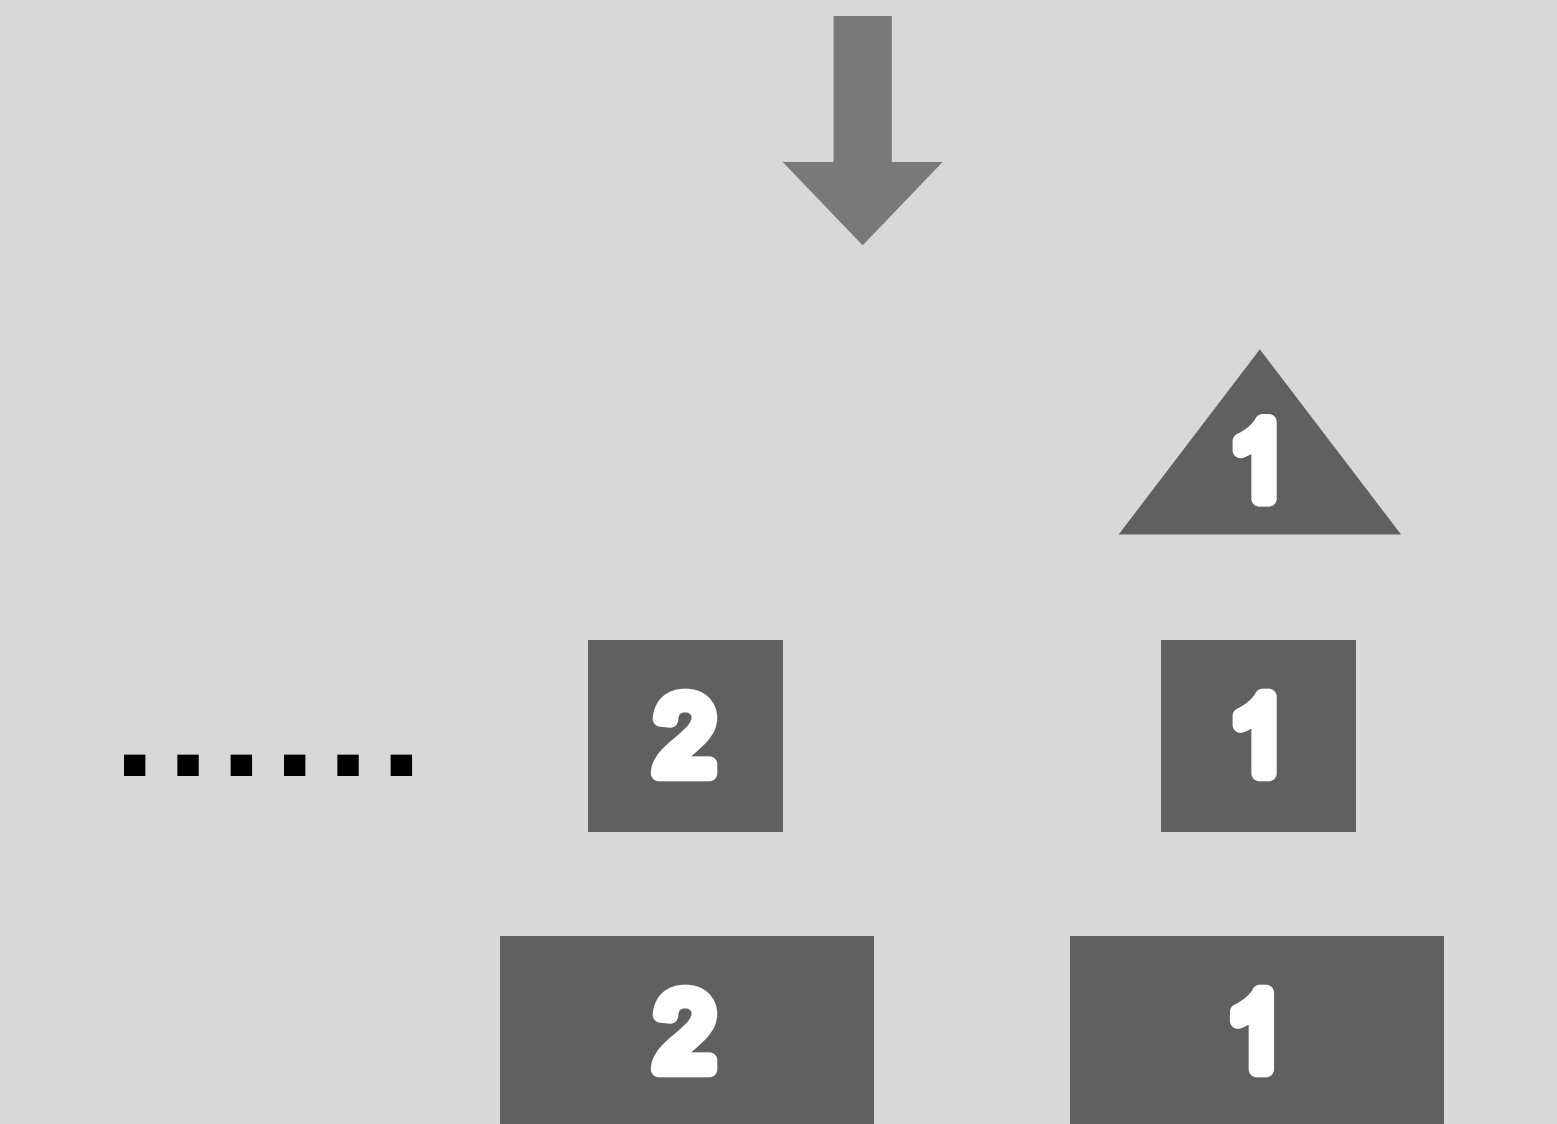

0.1.2 Euclidean Distance Detection

0.1 Workspace Pruning & Ordering

0.2.1 Pruned by reachability,

0.2.2 Ordered by Euclidean distance

0.2 Scene Grounding
